Fighting for an AIDS-free generation

Strategic Plan

2020-2025

The Elizabeth Glaser Pediatric AIDS Foundation is a proven leader in the global fight to end HIV and AIDS, and an advocate for every child to live a full and healthy life into adulthood.

Founded through a mother's determination, the Elizabeth Glaser Pediatric AIDS Foundation (EGPAF) is driven to see a world where no other mother, child or family is devastated by this disease. For more than 30 years, EGPAF has been a leader in meeting urgent needs in pediatric HIV and AIDS in the world's most affected regions.

While we've seen significant progress in the fight to end HIV and AIDS – reducing new infections in children by more than 95% in the U.S. and by over 50% globally – there are alarming rates among adolescents and young adults, with nearly 10,000 youth becoming newly infected each week.

Each stage of life – from infancy to adulthood – brings new and different challenges, and EGPAF recognizes that ending this epidemic cannot be achieved in isolation. It requires access to prevention, treatment, and support services for all members of the family.

In 2020 and beyond, EGPAF will leverage our core expertise in service delivery, capacity building, research and advocacy to comprehensively address an evolving HIV and AIDS epidemic, and through our presence on the ground and on the global stage, we'll advocate for the health and well-being of children as they transition into adulthood.

1988-EARLY 2000s

First Advocate for Children
Living with HIV and AIDS
in the United States

2000-2020

Trailblazer in the Global Fight
to End AIDS in Children

2020+

Leader in the Charge for
Sustainable HIV and AIDS
Epidemic Control in Children,
Youth and Families

VISION

A world in which children, youth, and families live free from HIV/AIDS.

MISSION

The Elizabeth Glaser Pediatric AIDS Foundation seeks to end HIV/AIDS globally in children, youth, and families.

GOALS

1

Advance research and innovations that lead to new, improved and scalable solutions to ending HIV and AIDS.

- Accelerate program outcomes through rapid evaluation and action.
- Identify, test, and scale new innovations.
- Advance HIV and AIDS prevention and treatment research.
- Implement and learn from robust data systems.
- Disseminate research findings.

2

Advocate on the global stage and at local levels for the resources, policies and leadership needed to address the epidemic.

- Increase national advocacy and public policy efforts to achieve sustainable programs.
- Catalyze leadership and influence HIV and AIDS policies.
- Advance accountability on HIV and AIDS policies and guidelines.
- Enhance international and U.S. advocacy to reinvigorate and maintain international commitment and action to end HIV and AIDS in children, youth and families.
- Influence HIV and AIDS goals.
- Remove barriers to access for HIV and AIDS services.

3

Strengthen local health care systems to effectively respond to HIV and AIDS and related health concerns.

- Expand access to quality HIV and AIDS services.
- Prioritize youth (ages 10-24) by improving health-seeking behaviors, treatment, HIV prevention, and access to sexual and reproductive health services.
- Facilitate integration of health services.
- Reduce mortality from co-infections that are the biggest threats to children, youth, and families living with or affected by HIV and AIDS.

4

Grow the capabilities of governments and communities through providing technical expertise and proven solutions.

- Engage communities to end the HIV and AIDS epidemic.
- Build capabilities to effectively deliver global technical assistance.
- Identify structural and technical approaches to advance local ownership and sustainability of programs.
- Disseminate program results and successes.
- Develop local research capacity.
- Build sustainable local capacity and health systems.
